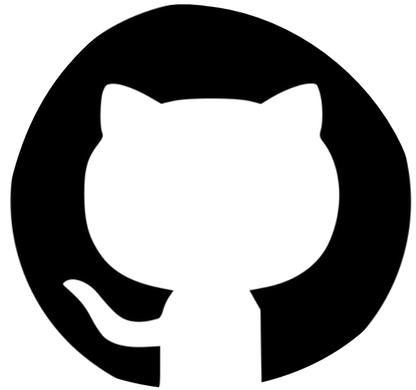
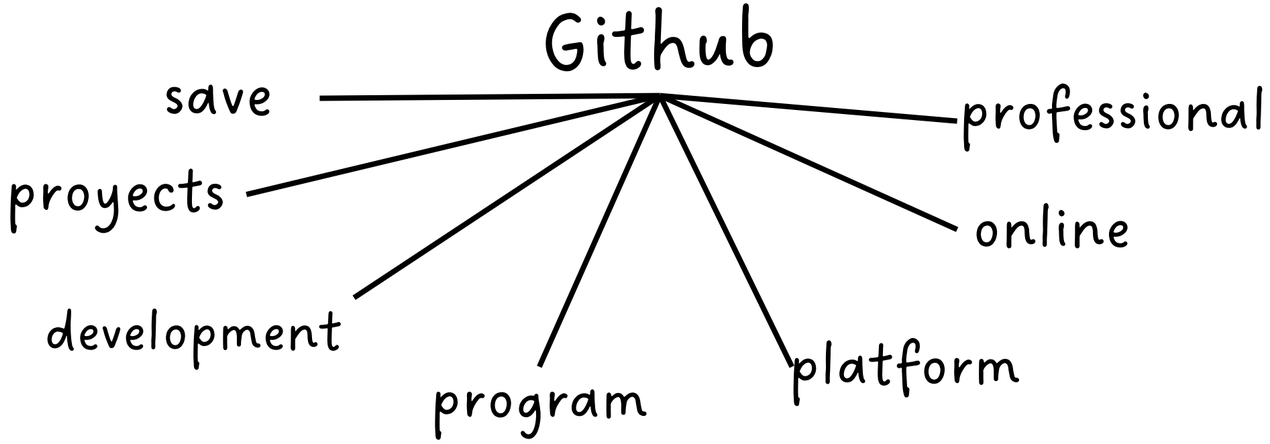
GITHUB

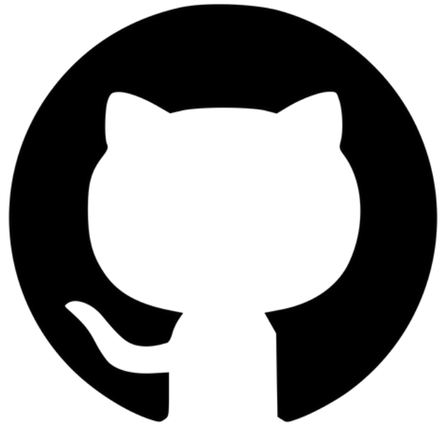
Name : Sami Reyes

Mr : César Martos



WHAT IS?





OCTOCAT

HISTORY OF THE GITHUB

GitHub immediately gained traction in the developer community thanks to its intuitive interface, powerful functionalities, and social coding capabilities.in June 2018, Microsoft announced the purchase of GitHub for $7.5 billion. Despite initial concerns from the developer community about Microsoft's intentions, it continued to operate freely and even expanded its services and offerings.

Under Microsoft ownership, GitHub continued to evolve, introducing new features and integrations to improve the developer experience.

Overall, GitHub's narrative is one of innovation, growth, and partnership building, solidifying its position as a cornerstone of new software development.

WHO CREATED GITHUB ?

- Chris Wanstrath
- PJ Hyett
- Tom Preston-Werner
- Scott Chacon

WHAT IS THE ORIGIN OF THE LOGO?

Have you ever wondered what the story is behind the GitHub image? "Tom Preston-Werner was trying to find a fun image for our 404 page, located the Octocat on iStockphoto and purchased the reduced use license for $50 (now exclusive owners)."

For PJ, the most interesting part of the Octocat story is how it transcends the GitHub society. Apparently everyone likes that little guy.
